About Myself

I am a student at the Faculty of Industrial Engineering and Robotics, eager to add real value to projects. Motivated and adaptable, I am passionate about programming and seek opportunities to develop my technical and interpersonal skills while contributing to a team's success.

Education

Faculty of Industrial Engineering and Robotics, Bucharest Polytechnic Bucharest, Romania

Favorite subjects: Data Structures and Algorithms, Computer Architecture, Databases, Operating Systems *Sep 2023 – Present*

Experience

Software Developer Intern Jun 2025 – Sep 2025

Cares Solutions SRL *Bucharest, Romania*

- Developed core backend logic and service layers using the **ASP.NET Core** framework to support scalable web applications.
- Implemented complex business rules and data processing workflows within the server-side architecture.
- Integrated and configured **ASP.NET Identity** to handle secure user authentication, token management, and authorization policies.

Projects

APK Malware Detector using Deep Learning

- Developed a **Django** web app for scanning Android apps using a **PyTorch** model (**96.7% accuracy**).
- Built a static analysis module with **Androguard** to extract permissions and API calls via One-Hot Encoding.

Multi-Platform Distributed Chat System

- Developed a **Java** & **Android** system using **TCP/IP Sockets** and a multi-threaded **ClientHandler** model.
- Implemented **MySQL (Docker)** persistence and a **Binary Stream Protocol** for chunked file transfers.

Inventory & Sales Management System

- Developed a full-stack management system with **ASP.NET Core MVC**, **Entity Framework**, and **Identity**.
- Implemented core modules for authentication, vehicle catalog, and an **Admin Dashboard** for analytics.

Technical Skills

Languages: **Java**, **C#**, **Python**, **C**, **SQL**
Frameworks: **ASP.NET Core (MVC/Identity)**, **PyTorch**, **Android SDK**, **Entity Framework**
Tools: **Docker**, **Git**, **MySQL**, **Androguard**
Concepts: **TCP/IP Sockets**, **Multi-threading**, **REST APIs**, **OOP**, **Data Structures**, **ORM**
